

Use Case: Package Delivery

Secure Assets with Actsoft

An award-winning package delivery service with nearly 200 fleet vehicles in operation, manned by hundreds of employees.

Challenges

After a vehicle with high-value freight was stolen, this company needed a reliable way to secure and recover their assets if stolen. Additionally, they wanted to cut down on fleet abuse and reckless driving behaviors while monitoring vehicle use to ensure that their drivers were staying within set geographical boundaries and not using them for personal reasons.

Solution

Actsoft was the perfect solution to solve their existing problems while optimizing fleet performance. With Actsoft, they were able to track vehicles and get near real-time alerts and regular reports on all of their concerns, including vehicle locations, driver behavior, and route history.

Benefits

After implementing Actsoft, the company saw a huge spike in efficiency and monthly savings boosted by 20 percent. Additionally, there was increased safety awareness which, in turn, reduced driver complaints, workers' comp incidents, and accidents while behind the wheel, as well as the cost associated with each. On top of that, they saw a drastic reduction in fleet abuse, significantly reducing the amount of money spent on repairs, accidents, rentals, and any other associated fees. In fact, this easy-to-implement solution saves them an average of \$500 per month per vehicle. With nearly 200 vehicles in their fleet, that's a savings of close to \$100,000 every single month.
